

EXROP Student Ethnicity, 2003–2009

Students are selected for EXROP by HHMI professors and directors of HHMI-funded undergraduate programs at colleges and universities. EXROP exists to give students from groups underrepresented in the sciences opportunities in cutting-edge research labs.

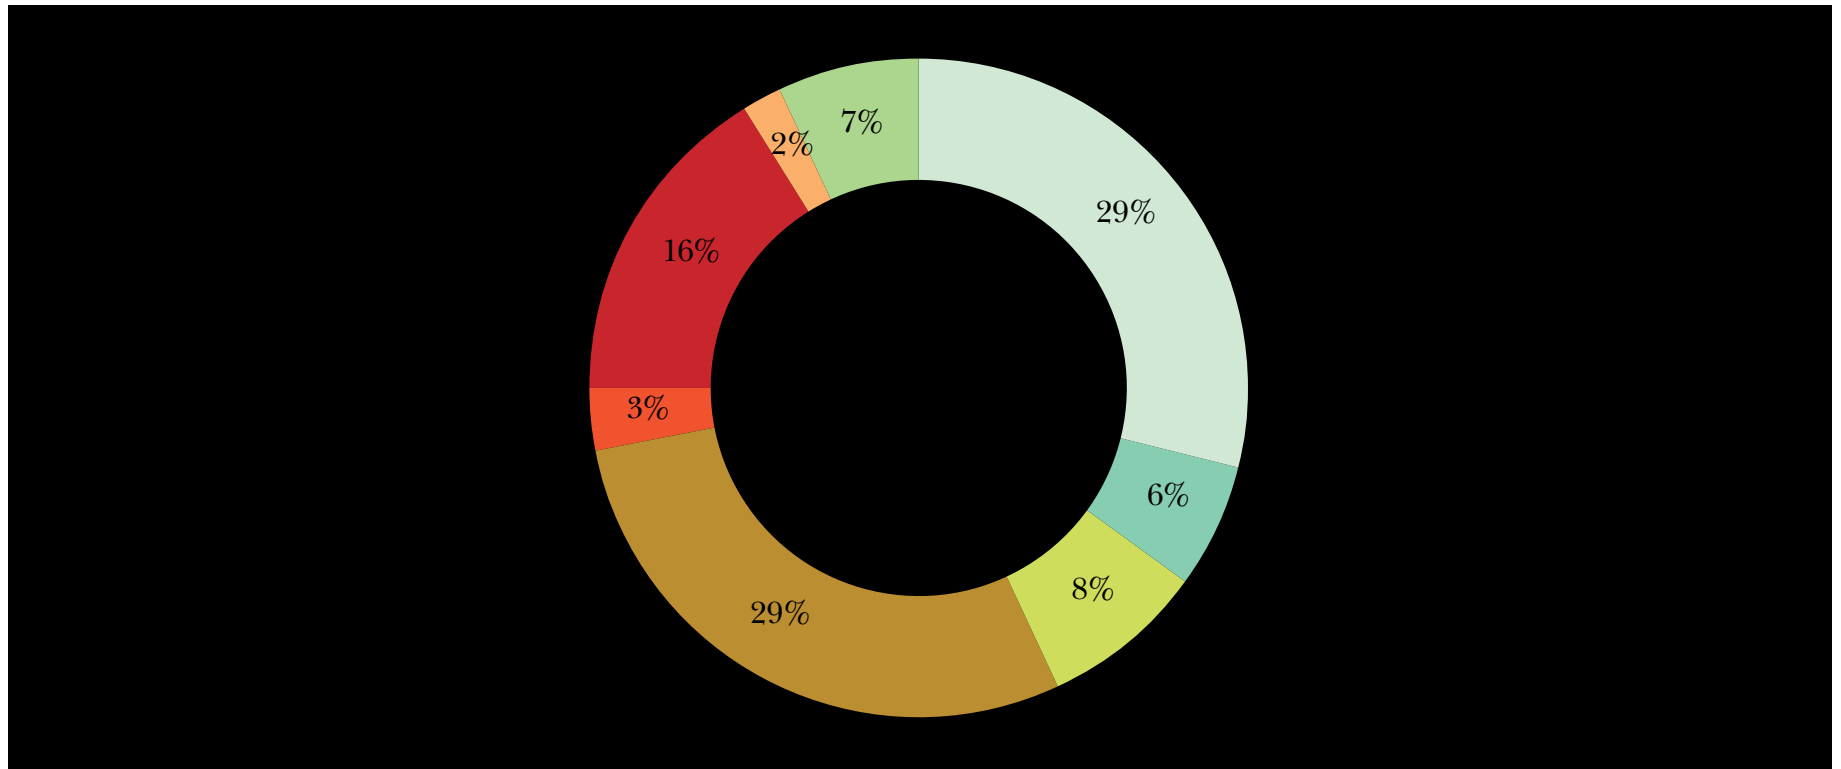

African American	Hispanic
Caucasian	Asian
Native American	Other/Multi-ethnic

EXROP Student Gender, 2003–2009

Though the gender balance is now fairly even at every level of education, women are still underrepresented in the uppermost tiers of academic science. In EXROP, the scales tip in the other direction.

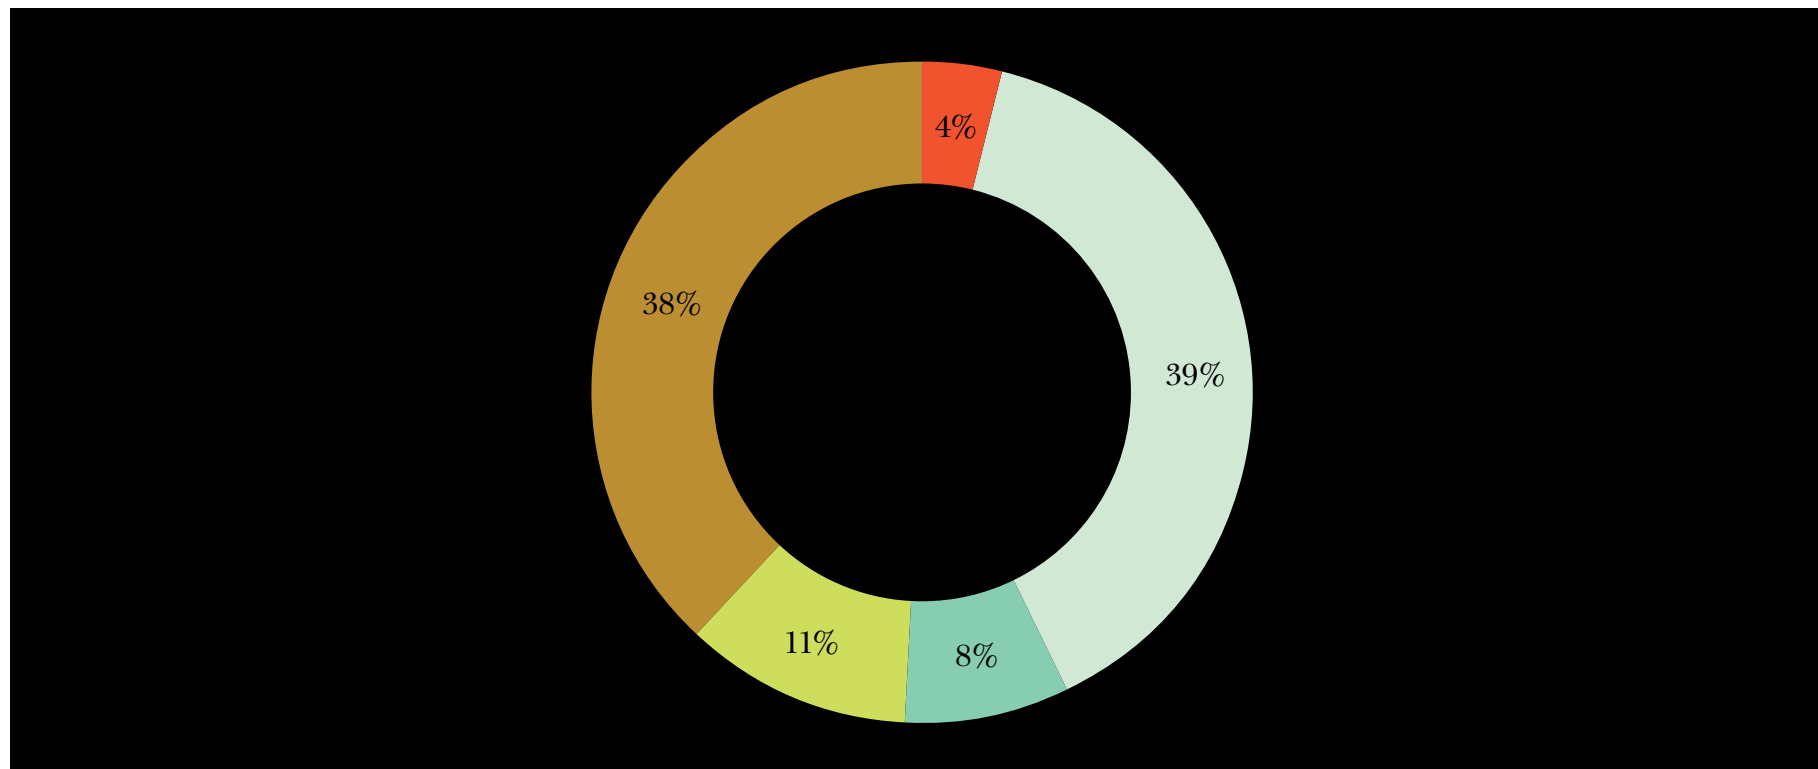

EXROP Career Outcomes, 2003–2008

Of the 189 EXROP students who have completed a baccalaureate degree, the vast majority are now pursuing an advanced degree.

PhD	Masters in Science
MD/PhD	MD
Other Science or Health Degree	Research Technician or Postbac
Teaching	Non-Science or Non-Health

EXROP Educational Outcomes, 2003–2008

Roughly 90 percent of EXROP alumni now in higher education are on the path toward a Ph.D., M.D., or M.D.-Ph.D.
